TECHNICAL SKILLS

Languages: C
Web Development: HTML, CSS, JavaScript

PROJECTS

Restaurant Landing Page
Tech Stack: HTML, CSS
- Designed and developed a fully responsive landing page for a restaurant using only HTML and CSS.
- Created an interactive user interface with engaging hover effects and smooth layout transitions.
- Ensured mobile compatibility using media queries and flexible grid layouts for optimal viewing on phones and tablets.

Personal Portfolio Website
Tech Stack: HTML, CSS
- Built a personal portfolio website to showcase skills, resume, and major projects.
- Structured intuitive navigation for "About Me", "Projects", and "Contact" sections using semantic HTML5.
- Designed with modern CSS styling to maintain visual consistency and professionalism.
- Ensured full mobile responsiveness to provide a seamless browsing experience across all devices.

Simple Calculator Web App
Tech Stack: HTML, CSS, JavaScript
- Developed a basic calculator web app performing addition, subtraction, multiplication, and division.
- Utilized JavaScript to handle input logic, real-time calculations, and dynamic output updates.
- Styled with CSS Grid for a neat, responsive button layout that adapts well to various screen sizes
